

RÜTZ® FOR CLEAN LABEL

Transparently Delicious™

PRODUCT HIGHLIGHT

Rütz® plant-based portfolio utilizes essences and extractives to provide a clean label option that offers the consistent and complex taste profiles desired of natural flavors without having to be labeled out as a flavoring

Crafted by nature, Rütz® plant-based taste options are designed to provide the ingredient transparency that modern consumers desire without compromising on taste. This innovative portfolio provides you more labeling options allowing your brand to feature transparency with ingredient declaration.

TRANSPARENCY

The food and beverage industry regulations for natural and organic continue to evolve. Consumers are demanding label information that they can understand or recognize. Natural flavors as an ingredient has been growing rapidly over the years to replace synthetic flavors. Additionally, the use of flavor extracts and essences has increased recently to clarify the source of the flavor.

To provide an additional level of transparency and options for labeling, the Rütz® portfolio is formulated with plant-based components that can be listed on the label.

At Flavor Producers, we have developed a portfolio of natural and organic flavors to meet the increasing consumer demand for transparent label options. The Rütz® line offers more options for this portfolio to optimize taste and provide transparency.

RÜTZ® LABELING OPTIONS

Rütz® is a unique flavor option that lets you go as far as removing flavors from your label. This flexibility in labeling choices allows you to find the ideal labeling solution for your brand.
